

Join the Beijer Ref UK & Ireland Team as a Project Engineer – Air Conditioning & Water Heating

Location: Midlands or Leeds

Company: Beijer Ref UK & Ireland

Are you experienced in mechanical or water heating engineering and passionate about heat pump systems? Beijer Ref UK & Ireland is seeking a Project Engineer – Air Conditioning & Water Heating to join our team. Based in the Midlands or Leeds, this role offers an exciting opportunity to make a significant impact in a leading refrigeration and air conditioning group.

About Us:

Beijer Ref UK & Ireland is a leading group of refrigeration and air conditioning wholesalers, with a network of 47 branch outlets supported by two centralised distribution centres. The group comprises four wholesalers:

- Dean & Wood Ltd
- HRP Ltd
- RW Refrigeration Wholesale Ltd
- DWG Refrigeration Wholesale Ltd (Ireland)

Additionally, we operate Beijer Ref Refrigerants, the Beijer Ref Academy, and our MHI (Mitsubishi Heavy Industries) air conditioning business. Our dedication to excellence, innovation, and employee development sets us apart as leaders in the industry.

Your Role:

As Project Engineer, you will:

- Provide high-quality pre-sales and after-sales technical support to sales teams and customers for large applications and projects, including VRF and heat pumps.
- Specify and select air conditioning and heat pump products from the company portfolio and prepare high-quality quotations using technical and quotation tools.
- Promote good design and engineering standards, particularly for the mechanical and water side of systems.
- Support Application Engineers and other teams with equipment selection.
- Deliver remote technical support and attend site visits when necessary.
- Take ownership of technical and product management issues for designated products or technical subjects.
- Stay updated on market developments and assist in evaluating and introducing new products.
- Provide training and presentations to enhance technical knowledge across the business.
- Influence sales strategies and participate in meetings as required.

What We're Looking For:

- Experience in mechanical/water heating engineering and/or heat pump systems is essential.
- A technically minded individual with expertise in VRF and heat pump applications.
- Strong communication skills and a customer-centric approach.
- Proficiency with technical tools and software (SAP & 3DD experience is a plus).
- A team player who thrives in a collaborative environment.

What We Offer:

- Competitive salary
- Life assurance
- Company pension scheme
- Bike to work scheme
- Employee Assistance Programme
- Generous holiday allowance: 25 days per year, plus all bank holidays, increasing by 1 day per year up to a maximum of 30 days after 5 years of service

Why Join Beijer Ref UK & Ireland?

At Beijer Ref, you'll be part of an innovative and collaborative team with a commitment to developing industry-leading solutions. With a strong support network and a focus on personal and professional growth, we're here to help you succeed.

Ready to Apply?

Take the next step in your career with Beijer Ref UK & Ireland. Submit your CV and cover letter today, and be part of a team that's shaping the future of air conditioning and water heating!

We look forward to hearing from you!

Beijer Ref UK & Ireland is an equal opportunities employer.
