PRODUCT SUPPORT REDEFINED

What is FridgeHUB?

FridgeHUB is a specialist division of Beijer Ref UK & Ireland that aims to support refrigeration engineering companies with a unique range of products and services specifically designed for refrigeration projects. Our specialist team fully understands the unique needs of the trade from end-user activity levels through to project management of equipment deliveries. This, combined with a desire to offer the most commercially acceptable design, ensures you have the best possible chance to win the order.

The fridgeHUB team can take your project from the initial design brief and convert it into a detailed quotation covering all the equipment you need to secure the project.

With your FridgePROJECTS Manager and FridgeTECH support on hand, you can rest assured every detail will be taken care of, with all products available to purchase through our UK Wholesalers; DW, HRP or RW Refrigeration.

TECHNICAL ENGINEERS

FridgeTECH

FridgeTECH consist of four specialist application engineers who are dedicated to the fridgeHUB division and have the ability to take your project from cradle to grave. They can convert the brief you have and engineer a solution that provides the end-user with an ideal system solution to refrigerate their products.

The team are commercially aware meaning that the selections take into account real world commercial pressures. Our application engineers are also able to visit site to be part of your team and provide a united, cohesive representation to the end user. Our technical department are also there to provide pre-installation and post-installation support to ensure the products work as intended.

SPECIALIST PROJECT MANAGERS

FridgePROJECTS

The FridgePROJECTS team specialise in large refrigeration and heavy commercial projects, typically anything over 20kW in system duty. Using condensing units, packs, chillers, and a range of heat exchange products, we are confident we have a system and solution to meet your needs. Our desire is to provide you with the most commercially acceptable design ensuring you have the best possible chance to win the order.

Our team offers full project management for the supply of equipment from initial enquiry through to commissioning. Our personable team is able to work with you and your client as an extension of your own team where required.

For special order items your FridgePROJECTS Manager will keep you updated weekly so you are fully informed on the latest delivery information. In addition, they will work with you to ensure that your team is up to date with their training and that any support services required (such as commissioning) is arranged in good time.

DEDICATED PRODUCT SUPPORT

Creating Perfect Partnerships

Working alongside your team, our fridgeTECHs and your dedicated FridgePROJECTS Manager will form the perfect partnership to ensure you get...

- ✿ The best blend of sales and technical input for your project.
- ✿ Solutions from your dedicated sales & technical engineer.
- ✿ Assistance with any project from the initial concept or site visit right through to arranging commissioning of the system.
- ✿ Regular updates on all the latest product developments & legislative elements that may impact future projects.
- ✿ The latest possible training available from fridgeHUB.

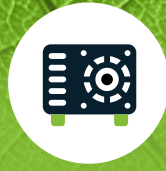

Let us provide your commercial project solution...

with our specialist fridgeTECH & fridgePROJECTS support.

DEDICATED PRODUCT SPECIALISTS

FridgeDIRECT

FridgeDIRECT consists of a team of dedicated product specialists, based in Leeds, who's expertise covers equipment with a capacity of circa 20kW in capacity. Experienced in the provision of equipment for cold rooms, freezer rooms and beer cellars, they respond to quote requests within 30 minutes and will personally process your order keeping you updated every step of the way. When you deal with our fridgeDIRECT team, you will have your own direct line to dedicated support.

Our FridgeDIRECT team, manned by product specialists, are on hand to support you through every step of your project requirements.

Just like our FridgePROJECTS team, you will be assigned with a FridgeDIRECT product specialist who will work in unison with our FridgeTECH team and you to ensure every technical, product specification, stock and logistics aspects are covered.

PROFESSIONAL TRAINING

FridgeTRAINING

We know first hand how beneficial our training courses are and how rare is it to have a training facility that is dedicated to refrigeration equipment. With this in mind, we have undertaken a program to open 6 professional training centres across the UK.

These centres showcase the range of products we offer combined with fully functioning systems for hands on training. For our fridgePRO accounts we offer an enhanced range of training packages, such as:

- ❄️ Professional refrigeration training
- ❄️ Factory approved product training
- ❄️ CO2 & A2L training courses
- ❄️ Chameleon personal insights development

Detailed, professional & technical project quotations

FridgeHUB will provide you a detailed Technical Quotation that consists of all the elements required for your project.

MARKET LEADING TECHNOLOGY

Leading products & brands you can trust...

The fridgeHUB team supplies equipment covering all your refrigeration projects, from leading and trusted manufacturers, all of which can be offered with extended warranties, detailed technical information, product support & commissioning, ensuring every project is a breeze.

Alongside our fantastic equipment range, we also supply everything else you'll need for your project, all available to purchase through our UK wholesalers; DW, HRP or RW Refrigeration, ensuring every aspect of your project is well managed, every step of the way by our team.

THE ESSENTIAL PARTNERSHIP

FridgePRO

The refrigeration trade has historically been a poor relation to the air-conditioning market where training programmes, partnership schemes, dedicated support services and factory visits are the norm. In comparison, the refrigeration industry get offered, well, not a lot!

Here at fridgeHUB, we acknowledge that this does not recognise the advanced engineering skills that go with this sector of our trade. With this in mind, we have introduced a partnership scheme specifically for refrigeration engineering companies, providing a fantastic package of benefits that have been designed to enhance your businesses competitive edge in the market.

The benefits include enhanced training packages that is either subsidised or free (dependent upon your PRO tier), access to enhanced warranty packages, branded clothing for you and your staff, van graphics and marketing & factory support.
